## TRUMPF Slat Cleaner TSC

With the TSC 1, you can clean the support slats of your laser cutting machines

- quickly and economically
- easily and with little effort
- safely and quietly

# TRUMPF Slat Cleaner TSC

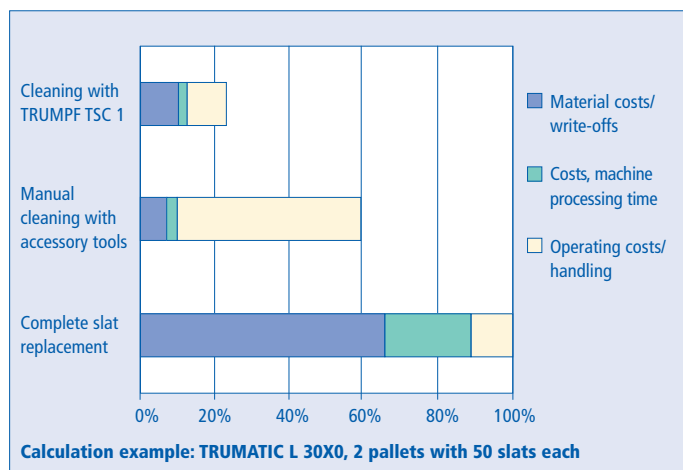

The process stability of a laser cutting machine depends, to no small degree, on the condition of its support slats. If they are dirty, not only does the process become less stable but the quality of the finished parts also suffers.

With the TSC 1 slat cleaner, TRUMPF offers a novel type of power tool which lets you clean the slats on practically all conventional flatbed laser machines quickly and reliably and save money at the same time. After all, you can now clean the slats several times before they have to be replaced. This yields savings of up to 75 percent. Even when compared to cleaning by hand, costs are at least two third lower.

Thanks to its automatic forward feed, operation of the slat cleaner is a breeze. The TSC 1 is extremely fast. This is made possible by two pairs of rollers which crush the slag. The cleaner adapts automatically to different slag thicknesses so that even heavily contaminated slats are no problem anymore. On flatbed laser machines with a pallet changer, cleaning takes place while production is running. You don't even have to remove the slats. The days of time-consuming cleaning by hand or with tools that you built yourself are finally a thing of the past.

## Cost comparison – Cleaning and replacement of support slats

## Accessories TSC 1

### Included accessories

Crushing rollers	integrated	
Finishing rollers	integrated	
Front grip, complete		1359159
Rear grip, complete		1359355
Lubricant press (filled)		1369906
Hexagon head screw		0369003
Operator instructions		1369898
Carrying case		1369920

### Available accessories

Crushing rollers	set of 2	1369900
Finishing rollers	set of 2	1369901
Tool set (2 crushing rollers, 2 finishing rollers)		
protective plates left / right, 4 stripper plates)		1369902
Protective plate left		1355174
Protective plate right		1355173
Stripper plate	set of 4	1372907
Grease „G1“	900 g	0139440
Carbon brush (set of 2)	110 - 230 V	0349350

### Further options

Cable holder		1358686
Construction drawing for work station (for cleaning dismantled slats)		1366684

## Technical data TSC 1

Support slats thickness	mm	2.5 – 3.5
Max. slag thickness	mm	25
Min. spacing between support slats	mm	33.5
Working speed	m / min	8 – 10
Rated input power	W	1400
Weight	kg	13
